I'm passionate about improving the lives of others through design and I'm constantly looking to learn new things every day. I'm a self-taught designer and have learned a lot of processes, concepts, and theories of UX/UI and product design through attending courses, reading blogs, and applying these to projects in my spare time and at work.

Experience

UX/UI Designer

09/2019 – PRESENT | Freelancer

The main task is to help others with their projects. I work on application design, creating new product specifications, preparing proposals and documentation, communicating with stakeholders and the team.
